SUMMARY

Computer Engineering student with more than four years of experience in the field of Computer Science. Skilled in software development and mostly interested in the field of Data Science and AI, always aiming to deliver high-quality work and to thrive in collaborative environments. Driven by curiosity and innovation, I am always looking to create efficient technology-driven solutions.

EDUCATION

Universidad de Guadalajara <i>BSc. in Computer Engineering</i>	08 2022 – 06 2026 <i>Guadalajara, Mexico</i>
Centro de Enseñanza Técnica Industrial Colomos <i>Technical High School Diploma - Software Development Technician</i>	08 2018 – 06 2022 <i>Guadalajara, Mexico</i>

- Involved in the **development team of a web-based open source ERP of a local company**.
- **Maintaining** and improving the functionality of existing systems.
- Develop Full-Stack Web Applications.
- Building new product features and APIs for internal and external use.
- **Design** websites, applications, databases and software from scratch **using the best practices**.

HCL Tech 🔗 <i>HR Analyst</i>	09 2022 – 01 2023 <i>Guadalajara, Mexico</i>
--	--

- Support HR operations to keep employee information and documents in line with company policies.
- Retrieve information from the company's file **and create macros to store it automatically**.
- Create reports and presentations for the HR department.

PROJECTS

Professional portfolio 🔗 — <u>VueJS, Javascript, HTML, SCSS</u>	12 2024
--	----------------

- Devoleped with VueJs + Vite, it is a static landing page that displays important info about my professional profile, it has features like an interactive diagram, and a contact form who sends me emails
- [Live site here](#)

Beaver Deliver — <u>Flask, Javascript, HTML, Bootstrap, SQL</u>	08 2024
--	----------------

- Beaver Deliver is a web-based service that allows delivery drivers from different companies to optimize their routes with the main purpose of reducing operating costs. It uses Google MapsAPI to calculate the most efficient route given the addresses each driver must visit in a day.

DEEMU 🔗 — <u>ReactJS, Binance Smart Chain, HTML, Bootstrap</u>	04 2022
---	----------------

- Applying my skills to create, research, and learn new technologies, I developed along with some classmates a website made with ReactJS whose function is to promote a cryptocurrency with a fee for charitable purposes in each transaction. It also has a blog where the community using this token can generate discussions and decide the purpose of the commission.
