SUMMARY

I am a passionate computer engineering student looking to be involved in the development of new software solutions throughout innovation.

SKILLS

Programming Languages: Java, SQL, Python, JavaScript, HTML, C/C++, JS, PHP, C#

Technologies: Git, LaTeX, ClickUp, Docker.

PROJECTS

Binance, React

DEEMU

Applying my skills to create, research and learn new technologies, I developed along with some classmates a website made with ReactJS whose function is to promote a cryptocurrency with a fee for charitable purposes in each transaction, it also has a blog where the community using this token can generate discussions and decide what the purpose of the commission.

.NET, C#

Mini Blackjack

In order to improve my proficiency in .NET application development, I developed a mini-game that reassembles a casino using the .NET framework to make an application that simulates a casino where the player plays his hand against the system.

EDUCATION

8/2018 - 6/2022

Centro de Enseñanza Técnica Industrial Colomos

Software Development Technician

Technical High School Diploma

8/2022 - Today

Universidad de Guadalajara CUCEI

B.S. in Computer Engineering

Bachelor's Degree

VOLUNTEERING

5/2019 - 6/2022

IT Equipment Maintenance

IT Department

- Applying my technical skills I was able to repair and maintain IT equipment and put in a better distribution, having a positive impact in my high school's IT department as this provided a better end-user experience.

EXPERIENCE

9/2022 - 1/2023

HR Analyst

HCL Technologies

- Support HR operations to keep employee information and documents in line with company policies.
- Retrieve information from the company's file and create macros to store it automatically.

Excel / Microsoft Sharepoint

1/2023 - Present

Web Developer

Freelance

- Design new tables to support business requirements, ensuring data integrity, normalization, and optimal performance.
- Utilize my data modeling and design expertise to create and optimize database tables in alignment with industry-standard conventions and best practices.
- Involved in the development team of a web-based open source ERP of a local company.
- Develop the CRM side of the system and part of the inventory management, developing functionalities to capture, store and query information from the database.

PHP / Laravel / MSSQL / JavaScript

LANGUAGES

English - C1, German - B2, Spanish - native

SOFT SKILLS

- Teamwork
- Leadership
- Problem solving
- Adaptability
- Resourcefulness
- Curiosity
- Analytical thinking
