Summary

Software engineer with about 3 years of experience in backend services, APIs and data-driven applications, now building LLM-powered agents as an AI Engineering Intern at Intel. Remote-first; I audit data before building and document as I go. Trilingual.

Experience

Intel **Jun 2026 – Present**
AI Engineering Intern *Jalisco, Mexico*

- Designing private AI toolchains to streamline internal engineering workflows.
- Building and maintaining custom LLM-powered assistants and agents for Intel's internal engineering teams.
- Rolling out AI-enhanced solutions across multiple post-silicon validation teams with consistent tooling standards; completed internal security validation training (fuzz testing, holistic security assessment).

ELI Schools / Work & Study Travel LATAM **2026 – Present**
Software Developer (Contract) — Orion 2.0 CRM *Remote*

- Building the Sales Dashboard: pipeline by country, campaign and status, lead control by agent, and daily agent objectives.
- Modeled the team hierarchy (groups → teams → agents) and lead pipeline stages; audited production data first, documenting integrity gaps (empty stage fields, missing lead joins, ambiguous booking states).
- Turned stakeholder requirements into technical specs and data-model reference docs; fixed Email Editor compatibility issues (e.g., Outlook's lack of *border-radius* / *object-fit* support). Stack: Base44, AI-assisted development.

HPT Center and Planning **Mar 2025 – Jun 2025**
Full Stack Developer *Remote*

- Built and deployed RESTful APIs in Laravel in a modular, service-oriented architecture with reusable services and middleware.
- Cut frontend load times by 30% optimizing Blade templates; deployed on Linux with Git/Docker; documented the architecture.

ITEKNIA Equipamiento **Jan 2023 – Mar 2025**
Software Developer *Remote*

- Designed and implemented backend systems for CRM and inventory management, including real-time data services.
- Modeled and optimized relational databases for faster queries; delivered full-stack apps with clean UIs.

HCL Technologies **Sep 2022 – Jan 2023**
HR Analyst *Jalisco, Mexico*

- Automated reporting workflows with Excel macros, reducing manual work; built dashboards for data-driven management decisions.

Education

Universidad de Guadalajara, CUCEI — *B.Sc. in Computer Engineering*, Guadalajara **Aug 2022 – Dec 2026 (expected)**
University of Cologne — *Exchange Semester*, Cologne **Oct 2025 – Mar 2026**
CETI Colomos — *Technical Diploma in Software Development*, Guadalajara **Aug 2018 – Jun 2022**

Projects

Nutriplatanos — *Laravel 12, PHP, Blade, Ubuntu Linux, Git* · app.nutriplatanos.com **Ongoing**

- Production app self-hosted on my Ubuntu server; safe deploys (local → GitHub → pull-only) with a *legacy* backup branch.

Professional Portfolio — *Vue, Vite, JavaScript, Tailwind CSS, D3* · frgonz.dev **2024 – 2026**

- Responsive, trilingual personal website; reduced page load time by 35% (2.1s → 1.3s).

Beaver Deliver — *Python, Flask, SQL, JavaScript* **Aug 2024**

- Flask backend optimizing delivery routes via external APIs; routing algorithms to cut logistics costs, auth with RBAC.

DEEMU — *React, Blockchain* **Apr 2022**

- Blockchain platform for transparent charitable transactions with community-forum governance.

Skills

Languages: Python, Java, SQL, JavaScript, PHP, C, C++, C#
Frameworks: Laravel, Flask, FastAPI · React, Vue, Vite, Blade, SCSS · Pandas, PySpark, TensorFlow, LLM agents
Infrastructure & Tools: Linux (Ubuntu server admin), Git & GitHub, Docker, Excel macros, Base44, AI-assisted development
Core Concepts: REST API design, service-oriented architecture, relational DB design, data modeling, DSA, OOP, UML, auth & RBAC, performance optimization, technical documentation
Spoken Languages: Spanish (Native), English (C1), German (C1)
